The challenges of divorce and custody disputes experienced by all families who engage with the Probate Court are often augmented for marginalized communities, including LGBTQ+ families. This conference will provide a solid research-based understanding of developmental pathways for gender identification and sexual orientation. It will explore how parenting, divorce, and co-parenting can be better understood when a parent or child is gay or trans, including the misconceptions and biases that may operate when these families engage with the legal system. Clinical services for children and parents will be discussed, the legal realities that LGBTQ+ families and children face will be introduced, and case-based experiences of professionals working in the trenches will be shared. This conference is aimed toward lawyers, clinicians, Guardian *ad litem*, and other forensic professionals working with LGBTQ+ families to evaluate, advocate, and forge pathways

forward in a more informed, professional, and compassionate manner through a combination of lecture and interactive audience engagement.

Learning Objectives

- Participants will be better equipped to evaluate, advocate for and/or treat LGBTQ+ individuals and families.
